

DESCRIPTION

The clearSTILL 200 is a manual single-stage wiped film evaporator that is our clearSTILL 400's little brother. The machine is designed to provide an avenue for those looking for superior distillation equipment at the ground level. With the clearSTILL 200 you can expect outputs of 2-3L per hour of distillate. This is a great starter machine for those looking to get their feet wet into distillation.

MANUAL SYSTEM WITH MANUAL CONTROL

- Single staged wiped film distillation.
- Single Stainless Still with independent temperature control for evaporator jacket, condensing finger, roughing pumps, and preferential turbo pumps.
- Roughing vacuum pumps.

Dimensions: 90"x44"x72" (LxWxH)
